Abuzar Hindi (7525899794/hindiabuzar@gmail.com)

Date

23.09.2026

Project Status

Delivering

Majedaar Restaurant requires a complete digital platform for its restaurant business.

The project includes a customer-facing website where customers can view the restaurant menu, check food details, place delivery orders, select payment methods, track their orders and provide feedback.

The project also includes an admin panel for the restaurant team to manage orders, menu items, payments, refunds, delivery areas, reviews and customer messages.

The current project consists of:

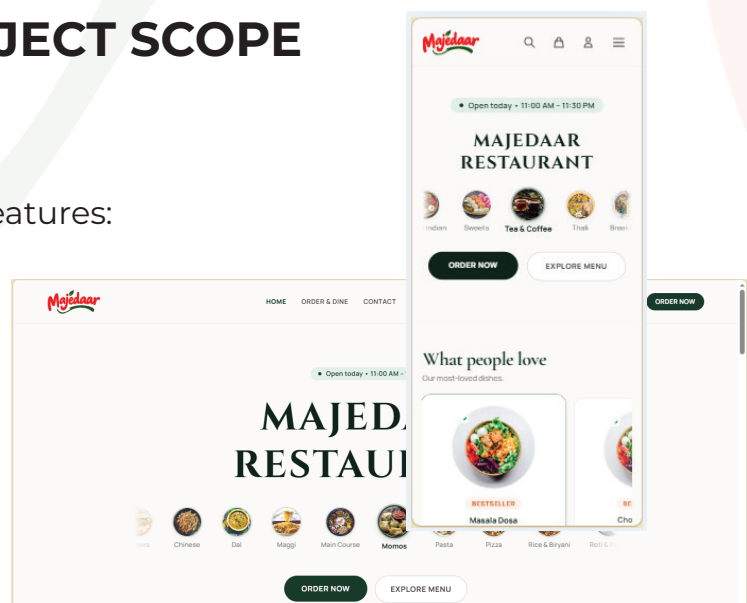

Customer Website
Restaurant Admin Panel
Backend System
Online Payment Integration
Delivery Management
Customer Account System
Reviews & Ratings
Customer Support / Feedback

PROJECT SCOPE

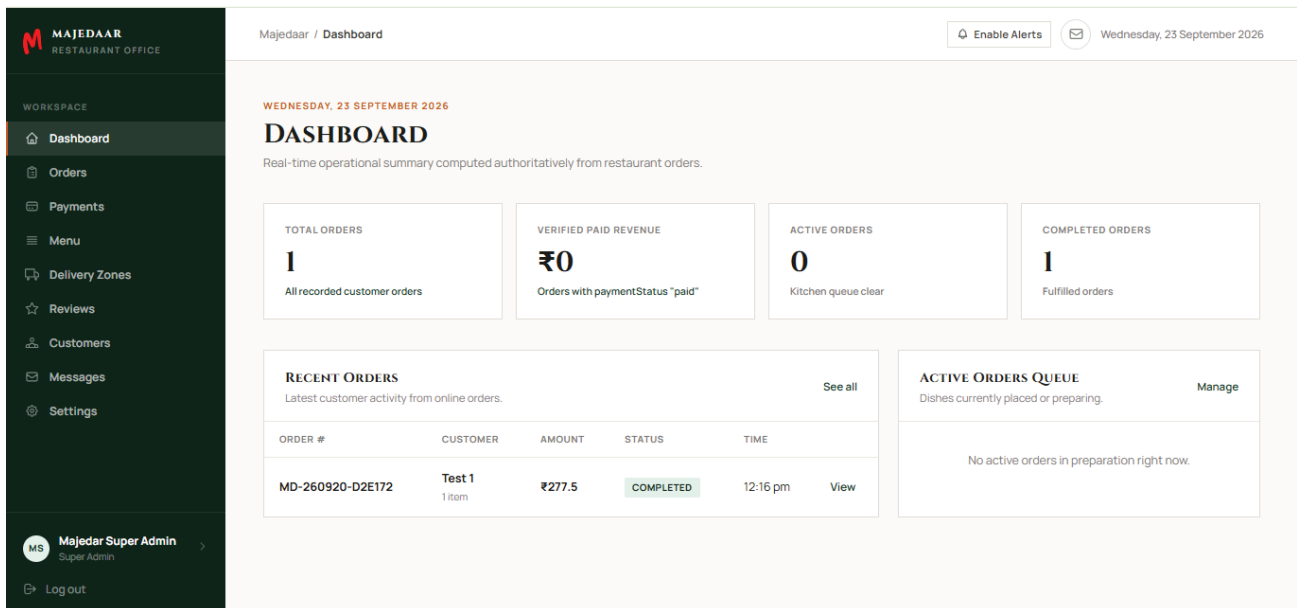

Restaurant Customer Panel

The customer website includes features:

- BestSeller Food Items
- Profile Page Customisation
- Order and Dine Page
- Cart
- Order History
- Delivery Address customs
- Help Us page, FAQ's Page

Restaurant Admin Panel

The screenshot shows the Majedaar Restaurant Admin Dashboard for Wednesday, 23 September 2026. The dashboard provides a real-time operational summary. Key metrics include:

- TOTAL ORDERS:** 1 (All recorded customer orders)
- VERIFIED PAID REVENUE:** ₹0 (Orders with paymentStatus "paid")
- ACTIVE ORDERS:** 0 (Kitchen queue clear)
- COMPLETED ORDERS:** 1 (Fulfilled orders)

The **RECENT ORDERS** section shows the latest customer activity from online orders. A table lists the following order:

ORDER #	CUSTOMER	AMOUNT	STATUS	TIME	
MD-260920-D2E172	Test 1 1 item	₹277.5	COMPLETED	12:16 pm	View

The **ACTIVE ORDERS QUEUE** section shows that there are no active orders in preparation right now.

The admin panel allows authorised restaurant staff to manage day-to-day restaurant operations.

- Dashboard
- Orders
- Payments
- Menu - Add Menu, Edit Menu, Manage Category
- Delivery Zones, Reviews
- Customers, Messages
- Settings

The backend handles orders, customer accounts, pricing, payments, delivery rules and other system operations.

The project uses external services where required, including payment, email, image storage and WhatsApp-based delivery communication.

CUSTOMER WEBSITE REQUIREMENTS

Home Page

Restaurant introduction. Featured/bestseller food items. Menu categories. See bestseller items, Food item previews. Clear option to view the menu and place an order, Restaurant information

Checkout and Delivery Page

Name, Phone number, Email, Delivery address, Area, Landmark
Delivery instructions

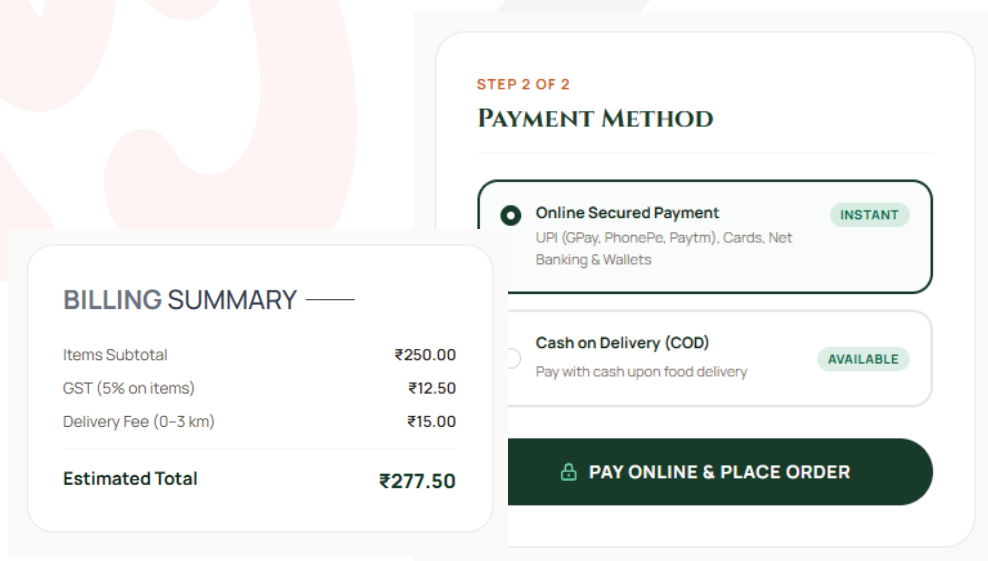

On Arrival Msg: Call on arrival, Leave at the gate, Don't ring the bell, Other

PAYMENT REQUIREMENTS

Cash on Delivery (COD)

Online Payment

Customers can pay online using the Razorpay payment gateway.
The system supports payment retry if an online payment fails or is cancelled.

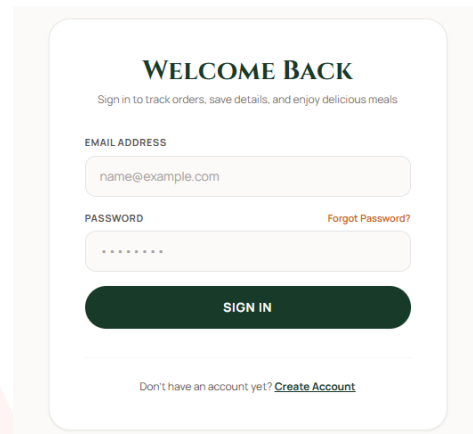

The screenshot displays the payment interface. On the left, a 'BILLING SUMMARY' box lists: Items Subtotal (₹250.00), GST (5% on items) (₹12.50), Delivery Fee (0-3 km) (₹15.00), and an Estimated Total of ₹277.50. On the right, the 'STEP 2 OF 2 PAYMENT METHOD' section offers two options: 'Online Secured Payment' (INSTANT) using UPI, Cards, or Net Banking, and 'Cash on Delivery (COD)' (AVAILABLE) for cash payment upon delivery. A large green button at the bottom reads 'PAY ONLINE & PLACE ORDER'.

Refund Payment

The restaurant admin can initiate partial/full refunds for eligible online payments.

CUSTOMER ACCOUNT

- Create an account
- Log in
- Verify their email
- Log out
- Recover a forgotten password
- View their account information
- View previous orders

The image shows a login form titled "WELCOME BACK". Below the title is a subtitle: "Sign in to track orders, save details, and enjoy delicious meals". There are two input fields: "EMAIL ADDRESS" with the placeholder "name@example.com" and "PASSWORD" with a masked password "*****". A "Forgot Password?" link is next to the password field. Below the inputs is a dark green "SIGN IN" button. At the bottom, there is a link: "Don't have an account yet? [Create Account](#)".

Order Management for Customers
